FERN *and* FLOWER
FARM, INC. 1878

Southwick, Mass. 1940

A Message to Customers and Friends

PACKING

This department is in charge of experts who use the utmost care in digging and packing all orders. We have always used sphagnum moss in wrapping plants; it is the very best material which can be procured. No matter whether an order is small or large, it always receives the same careful attention, and we can assure any prospective buyer that all orders will be packed properly. Throughout the season we receive numerous testimonials from our customers telling us of the excellent manner in which stock arrived, although in many cases delayed for a long time in transit. These testimonials we receive from all parts of the United States. Those who live at a considerable distance need have no fear about stock arriving in poor shape due to faulty packing.

SHIPPING

We always advise having herbaceous stock shipped by express and will make delivery by this method unless otherwise advised. Please give us definite instructions as to mode of transportation desired, giving routing where there is any preference; where no routing is given we will use our best judgment in making shipment but will not be held responsible for delays which may result from such action.

PRICES

Five of any one variety will be sold at the 10 rate; 30 of one variety will be sold at the 100 rate; 300 of one variety will be sold at the 1,000 rate, where the 1,000 rate is given.

Prices on ferns and herbaceous stock include packing and delivery to the local freight or express office. All prices are based on express or freight shipment. In case a customer desires to have stock shipped by parcel post, 10 per cent of the amount of the order should be added to cover delivery charges east of the Mississippi River, and 20 per cent on orders to points west of the Mississippi River.

All evergreens and shrubs will be shipped by express or freight collect. The prices on evergreen trees, evergreen shrubs, and deciduous shrubs include all packing charges, and delivery to the local express or freight office.

CLAIMS

No claims will be entertained unless received within ten days after the receipt of the stock. While we use proper care in packing, we cannot be held responsible for undue delay in transit. We hold ourselves in readiness at all times to replace stock which arrives in poor order due to faulty packing.

HOW TO REACH OUR NURSERIES

Our nurseries are located at Southwick, Mass. The New College Highway extending from Northampton to New Haven passes our nurseries, making them easily reached by automobile from all directions. Visitors are always welcome.

HARDY FERNS

Hardy Ferns are being used in quantity for massed plantings, and selections can be made to suit almost any location. Many times there are corners about the house where the sun does not strike. Such places can be beautified by the use of Hardy Ferns. There are a few varieties of hardy native Ferns which will thrive in the open sun, yet, for the most part, they will give much better results when planted in a shady location. The Ferns we offer, being native, require a period of rest and consequently are not suitable for house culture in the winter.

Soils. Some of the larger-growing Ferns can be grown with extremely good results in ordinary garden soil in a shady location, yet, if we intend to imitate Nature, it will be necessary to furnish, for many of our Ferns, better conditions than are found in the ordinary garden. In planting Ferns it is well to prepare the soil by making it very fine, then adding, if practicable, leaf-mold so as to make the soil very light and porous. If the planter does not have at his disposal a sloping piece of ground and is anxious to have Ferns in his garden, it will be well to raise the bed 2 to 3 inches in which they are planted. This will tend to produce the drainage conditions necessary.

In planting the small rock Ferns, almost pure leaf-mold or peat should be used. This class of Ferns is, as a rule, found growing in such soils and while they can be made to struggle along and in some cases give fairly good results in ordinary garden soil, they will do much better if furnished the conditions as above described.

Uses. Our Hardy Ferns, being so varied in their characteristics, can be adapted to a wide variety of purposes. All of them can be used as specimens in the Hardy Fern collection; many can be used for edging walks in a shaded rock-garden; while others are best suited for massed plantings.

Time to plant. Hardy Ferns can be planted in either the spring or fall. If they are planted late in the autumn it is well to give them a mulch of leaves. This gives them protection from freezing and thawing and it also tends to retain the moisture in the soil until the new rootlets have started to grow.

How deep to plant. Doubtless many amateurs are not successful in growing Ferns, due to the fact that they place them too deep in the ground. Those varieties, such as the Christmas Fern or Evergreen Wood Fern, which grow from a crown should not be planted below the surface; the crown should be left exposed to the air. In case Ferns grow from underground root-stalks, such as the Beech Fern, they should be planted just below the surface with not more than half an inch of earth to cover them. Too deep planting proves fatal, especially where a long, wet season follows the planting which causes the crowns or buds to rot.

May we help you with your garden plans?
We will gladly share our years of experience with you if you will drop us a line.

**NATIVE
 WILD FLOWERS
 and
 ROCK PLANTS**

Many of the varieties you find listed below are native plants. There is no class of plants which gives the same permanency of effect as do these. When established they bloom year after year, while many of the so-called hardy plants pass their period of usefulness after two or three years.

ARISAEMA TRIPHYLLUM

◐

A shady nook, a few rocks, wild flowers and ferns—a bit of paradise on earth. That woodland spirit you adore will move to your home grounds with the children of the woods. Those Bloodroot and Ladyslippers, Bluebells and Trilliums at your doorstep will create a unique atmosphere not to be attained with the more pretentious flowers of civilization. Ours is one of the most unique nurseries in the country. We specialize in native plant gems, nature's own contribution to making this a brighter, better world.

◐

GAULTHERIA PROCUMBENS

	Each	Per 10	Per 100
<i>Iris cristata</i> , Crested Iris, Pale blue, May25	1.50	12.00
<i>Iris pseudacorus</i> , Yellowflag Iris, Yellow, June25	1.50	12.00
<i>Iris verna</i> , Vernal Iris, Blue and yellow, May25	1.50	12.00
<i>Iris versicolor</i> , Blueflag Iris, Blue, June25	1.50	12.00
<i>Liatris pycnostachya</i> , Cat-tail Gayfeather, Purple, July25	1.50	12.00
<i>Liatris scariosa</i> , Native Gayfeather, Purple, July25	1.50	12.00
<i>Lilium canadense</i> , Canada Lily, Yellow, July25	2.00	15.00
<i>Lilium philadelphicum</i> , Orange-cup, Reddish orange, July25	2.00	15.00
<i>Lilium superbum</i> , American Turkscap, Orange, July25	2.00	15.00
<i>Lobelia cardinalis</i> , Cardinal Flower, Red, July25	1.50	12.00
One of the showiest of our wild flowers. It is 2 to 4 feet high, with large, deep red blossoms along the upper part of the stalk. Will thrive in any garden soil or along the border of a lily-pond or brook in water 2 to 3 inches deep. The blooms contest the supremacy of any other red flower.			
<i>Lobelia siphilitica</i> , Blue Lobelia, Blue, June25	1.50	12.00
<i>Lychnis viscaria</i> , fl. spl., Rosepink Campion, June25	1.50	12.00
<i>Lysimachia numularia</i> , Moneywort, Yellow, June25	1.50	12.00
<i>Lythrum salicaria</i> , Loosestrife, Rose purple, July25	1.50	12.00
<i>Maianthemum bifolium</i> , False Lily-of-the-Valley, White, May25	1.50	12.00
<i>Mertensia virginica</i> , Virginia Bluebell, Blue, May25	1.50	12.00
<i>Mitchella repens</i> , Partridge Berry, White, May25	1.50	12.00
<i>Mitella diphylla</i> , Bishop's Cap, White, May25	1.50	12.00
<i>Myosotis scorpioides</i> , True Forget-Me-Not, Blue, May25	1.50	12.00
<i>Parnassia caroliniana</i> , Carolina Parnassus, White, May25	1.50	12.00
<i>Phlox amoena</i> , Amoena Phlox, Bright Pink, May15	1.00	8.00
<i>Phlox divaricata</i> , Blue Phlox, Pale Lilac, May25	1.50	12.00
<i>Phlox subulata</i> , Moss Pink, Phlox, May15	1.00	8.00
<i>Phlox subulata alba</i> , White, May15	1.00	8.00
<i>Phlox subulata lilacina</i> , Light Blue, May15	1.00	8.00
<i>Phlox vivid</i> , Clear Pink, May25	1.50	12.00

- Primula cachemiriana, 7-10 inches
- Primula japonica, 6-8 inches
- Thymus serpyllum album, 4 inches
- Thymus serpyllum coccineus, 4 in.
- Veronica prostrata, 4 inches
- Viola cornuta, 4-6 inches
- Viola lutea, 4-6 inches

TRILLIUM GRANDIFLORUM

	Each	Per 10	Per 100
<i>Shortia galacifolia</i> , Oconee Bells, White, April35	3.00	25.00
<i>Smilacina racemosa</i> , False Solomon's Seal, White, June.....	.25	1.50	12.00
<i>Solidago caesia</i> , Wreath Goldenrod, Yellow, August25	1.50	12.00
<i>Solidago canadensis</i> , Canadian Goldenrod, Yellow, August....	.25	1.50	12.00
<i>Solidago nemoralis</i> , Oldfield Goldenrod, Yellow, August25	1.50	12.00
<i>Thalictrum dioicum</i> , Early Meadowrue, Purple, July25	1.50	12.00
<i>Thalictrum polygamum</i> , Tall Meadowrue, White, July25	1.50	12.00
<i>Thymus lanuginosus</i> , Woolly Thyme, June15	1.00	8.00
<i>Thymus serpyllum</i> , Mother of Thyme, Lavender, June.....	.15	1.00	8.00
<i>Thymus serpyllum album</i> , White, June15	1.00	8.00
<i>Thymus serpyllum coccineus</i> , Scarlet, June15	1.00	8.00
<i>Tiarella cordifolia</i> , False Miterwort, White, May25	1.50	12.00
<i>Trillium erectum</i> , Purple Trillium, April25	1.50	12.00
<i>Trillium grandiflorum</i> , Snow Trillium, April25	1.50	12.00
Probably the prettiest of the genus, and most generally cultivated. It grows 8 to 15 inches high; large, white flowers, often 2 to 2½ inches in length and 2 inches wide, turning to lilac-color with age.			
<i>Trillium stylosum</i> , Rose Trillium, April25	1.50	12.00

CYPRIPEDIUM PUBESCENS

BOG PLANTS AND NATIVE ORCHIDS

CALTHA PALUSTRIS

To the group of plants which can be conveniently classed as Bog Plants belong some of the most interesting varieties of our American flora. These require a damp situation in which the moisture must be constant yet not excessive.

Native Orchids can be successfully grown under the right conditions. The *Cypripedium acaule* should be planted where the soil is very light, composed chiefly of sand and where the drainage is exceptionally good and should always be planted in the shade. The *Cypripedium spectabile* requires boggy conditions where there is constant moisture. The *Cypripedium pubescens* will grow either under boggy conditions or in a rich wood soil in the shade.

	Each	Per 10	Per 100
Acorus calamus , Sweet Flag.....	\$.25	\$ 1.50	\$12.00
Calla palustris , Wild Calla, Pale yellow, June15	1.00	8.00
Caltha palustris , Marsh Marigold, Bright yellow, April25	1.50	12.00
Calopogon pulchellus , Grass Pink Orchid, June25	1.50	12.00
Cypripedium acaule , Lady's Slipper.....	.25	2.00	15.00

This is often called the Red Lady's Slipper, but the flower is rose-purple in color. The plant sends up two broadish green leaves from the base, and from between them comes a stalk about a foot high, bearing a single large, showy flower. Plant in a well-drained soil, with some leaf-mold. This does quite well in pots.

Cypripedium pubescens , Yellow Lady's Slipper25	2.00	15.00
--	-----	------	-------

In this variety the petals are usually slightly twisted and are much narrower than the sepals. The flowers, which come in May and June, are pale yellow in color. The plant is found under natural conditions as far north as Newfoundland, and has a southern range into lower Georgia.

Cypripedium spectabile , Showy Lady's Slipper30	2.50	20.00
The finest and most showy of all our Orchids. It grows about 2 feet high, bearing along the stalk several rather large, roundish leaves, and on top one or two quite large rose-purple or nearly white flowers. It is a bog-loving plant, yet does exceedingly well in a moist and partly shaded bed of peat or leaf-mold. Nothing can be more charming than masses of this plant in a cedar swamp, its natural home.

EVERGREEN SHRUBS—NATIVE RHODODENDRONS

For permanent and substantial plantings in shaded places, nothing surpasses our Native Broad-leaved Evergreens. Native Rhododendrons and Azaleas combine to give a naturalistic planting that luxuriance which is hard to describe. Our stock is of the finest quality and is grown in our Nursery from cut-back clumps. The prices listed are f.o.b. Southwick and include packing charges.

A FINE EXAMPLE OF THE EFFECT THAT CAN BE PRODUCED BY PLANTING RHODODENDRONS AT THE EDGE OF A POOL OR POND.

Rhododendron catawbiense, Catawba

One of the most beautiful native shrubs and the hardiest of all the Rhododendrons. In June every branch is a large cluster of 1½-inch broad, rosy purple blooms. The foliage is the most handsome of any Rhododendron.

	Each	Per 10	Per 100
12-15 in.	2.00	17.50	150.00
15-18 in.	2.50	22.50	200.00

2-2½ ft.	3.25	30.00	275.00
2½-3 ft.	3.50	32.50	300.00

Rhododendron maximum, Rosebay

A hardy variety, of magnificent size, making it a wonderful plant for mass effects. The luxuriant growth of dark green, narrow leaves, 6 to 12 inches long, gives a delightful atmosphere. The light pink or white flowers, 1½ to 2 inches broad, are borne in large clusters in great abundance in June.

15-18 in.	1.75	15.00	125.00
18-24 in.	2.00	17.50	150.00
